EDUCATION

- Abilene Christian University** Abilene, Texas
• *Incomplete - Computer Science; GPA: 3.7* August 2012 - April 2015
Courses: Discrete Mathematics, Calculus and Linear Algebra, Algorithms and Data Structuring, Programming, Operating Systems, Database Management, Software Engineering, Web Development, Object-Oriented Programming, Systems Analysis and Design
- University of Texas at San Antonio** San Antonio, Texas
• *Incomplete - Business Administration and Management, General; GPA: 3.6* August 2016 - April 2018
Courses: Foundations of Business Career Readiness, Academic Research, Global Business Immersion, Business Consulting, Business Case Competition, Conducting Innovative Research and Discovery, Communication and Visualization of Impactful Research

SKILLS SUMMARY

- Languages:** Python, PHP, C/C++, JavaScript, SQL, Bash, JAVA, Lua, TypeScript, HTML/CSS, Ruby, Go, Swift
- Frameworks:** Flask, FastAPI, PyTorch, React, Vue.js, Next.js, Spring Boot, Angular, NestJS, Bootstrap, Vapor, LAMP
- Tools:** Kubernetes, Docker, GIT, PostgreSQL, MySQL, SQLite, ECS, Bitbucket, MongoDB, Redis, MariaDB
- Platforms:** Linux, Web, Windows, Arduino, Raspberry, AWS, Google Cloud, Azure, OpenAI, ReactOS
- Soft Skills:** Leadership, Documentation, Time Management, Work Ethic, Teamwork, Punctuality, Stakeholder Relations

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate:** Certified by Amazon Web Services (AWS)
Issued / Expiration: Issued April 2025 — Expires April 2028
Credential ID: 926633d8a8624489a0ffa57e0364ac4
- CompTIA Security+:** Certified by CompTIA
Issued / Expiration: Issued July 2026 — Expires July 2029
Credential ID: cefc367bc1514540bf9dbfec1845e343
- Google Cybersecurity Professional (v.2):** Certified by Google
Issued / Expiration: Issued July 2026 — Expires Never
Credential ID: AZAO6VB3P0EU

EXPERIENCE

- The Computer Loft** La Vernia, Texas
• *Technical Team Lead (Full-time)* March 2025 - Current
 - Hybrid Infrastructure Operations:** Led resolution of 300+ monthly service requests across on-premises hardware, business software, network infrastructure, and AWS-hosted services; diagnosed cross-layer failures and restored operations for small-business clients across healthcare, education, government, oilfield, nonprofit, and real-estate environments.
 - Network Infrastructure Deployment:** Built and commissioned network racks with switches, wireless access points, routers, firewalls, and supporting hardware; configured switching, routing, wireless, and security services, then validated connectivity and documented each production environment using Hudu to maintain comprehensive SOPs.
 - AWS Cloud Engineering:** Developed and maintained cloud services using S3, ECS, Lambda, API Gateway, DynamoDB, CloudFormation, CloudWatch, Route53, and Amazon Bedrock; implemented containerized and serverless workloads, infrastructure-as-code, monitoring, storage, APIs, and access controls.
 - Monitoring and Network Diagnostics:** Deployed Zabbix for infrastructure and service monitoring and used Nmap and Wireshark for asset discovery, port validation, packet analysis, and root-cause troubleshooting; improved visibility into network health and reduced trial-and-error diagnostics.
 - Technical Leadership and Standardization:** Served as the primary escalation point and technical decision-maker for client environments; standardized intake, triage, deployment, documentation, and resolution workflows to reduce repeat incidents and improve support consistency.
 - Custom Software and Micro-SaaS Development:** Designed and delivered client-facing applications, internal automation tools, and custom WordPress plugins using Python, PHP, JavaScript/TypeScript, SQL, and modern web frameworks; converted business requirements into maintainable software that extended existing platforms and reduced manual workflows.
 - Application Deployment and Data Architecture:** Containerized, versioned, and deployed business applications across cloud and on-premises environments using Docker, Kubernetes, ECS, Git, and Bitbucket; implemented relational, document, and in-memory data services with platforms such as PostgreSQL, MySQL, MongoDB, and Redis to improve scalability, portability, and supportability.

PROJECTS

- **CharacterForge AI — Desktop-first AI character platform (Generative AI, AWS Serverless, Game AI, Desktop Apps, API Platforms):** Built and released an AI-powered platform for creating, testing, packaging, and deploying structured game/NPC characters. Includes a Windows desktop app, AWS setup workflow, portable character packs, OpenAPI documentation, TypeScript SDK, and game-client integration examples. Published a Windows release candidate with installer, manifest, and checksum artifacts. (May '26)
Tech: Python, TypeScript, Rust, AWS Lambda, API Gateway, DynamoDB, Amazon Bedrock, Cognito, AWS SAM, OpenAPI, Tauri, React, Vite, PowerShell, NSIS.
- **Sigilore — Cloud-backed dark-fantasy virtual tabletop (Web Development, Realtime Apps, RPG Tools, Cloud Backend):** (WIP) Created a web-based virtual tabletop for running and playing turn-based RPG campaigns, with campaign/world management, interactive UI components, realtime/cloud-backed state, storage, auth, and edge-function integration. Built with strict TypeScript validation, security testing, bundle budgeting, and CI checks. (June '26)
Tech: TypeScript, React, Vite, Tailwind CSS, shadcn/ui, Supabase, PostgreSQL, Edge Functions, Bun, Vitest, Deno, GitHub Actions.
- **Custom Box Builder — WooCommerce custom product configurator (E-commerce, WordPress Plugin Development, Product Customization):** Built a custom box-design tool for WordPress/WooCommerce, including frontend configuration UI, admin settings, custom box type management, minimum order quantity rules, server-side price calculation, validation, and reorderable product options. Packaged for installation as a WordPress plugin. (Oct '25)
Tech: PHP, WordPress, WooCommerce, TypeScript, React, Vite, Tailwind CSS, shadcn/ui, jQuery UI, JavaScript, CSS.
- **Band-it — Full-stack web/mobile band discovery app (Full-stack Development, Mobile/Web Apps, AWS Cloud Architecture):** Designed and developed a cross-platform application concept for web and mobile users, covering authentication, user profiles, cloud storage, dynamic data access, and AWS deployment architecture. Built as an end-to-end solo project including branding, UI/UX, backend planning, and cloud infrastructure design. (May '25)
Tech: React, React Native, Node.js, AWS Lambda, Aurora Serverless PostgreSQL, S3, CloudFront, Cognito, API Gateway, IAM, Route53, Tailwind CSS, Figma, Krita.

HONORS AND AWARDS

- Awarded membership to Epsilon Pi Epsilon Honor Society - April, 2017
- TryHackMe AI Security CTF Event Runner-up - June, 2026
